Ariana, Tunisia · +216 53360446

Skills

Languages: Java 17, Python, TypeScript, SQL
Backend: Spring Boot 3.2, Spring Cloud, Node.js, Express, FastAPI, Symfony
Frontend: Angular 17/20, React 19
Databases: PostgreSQL, MySQL, MongoDB, SQLite, Oracle SQL, Flyway
Cloud & DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, NGINX
AI/ML: LLM integration (Ollama, Mistral), RAG pipelines, embeddings, FAISS, prompt engineering
Security & Testing: Keycloak, OAuth2, JWT, 2FA, RBAC, pytest, Playwright
Spoken languages: Arabic (native), French (fluent), English (B2), German (A1)

Professional Experience

Full-Stack Developer Intern — SPIRAW
React 19, Node.js, Express, PostgreSQL, Docker, NGINX, GitHub Actions *Jul 2026 – Aug 2026*

- Developed the participant lifecycle for **Spiraw Quiz**: event discovery, registration, **real-time scoring** and leaderboards.
- Implemented **2FA**, HttpOnly session cookies, token hashing, rate limiting and audit logging; containerized services with Docker Compose and NGINX.
- Automated **CI/CD** with GitHub Actions, linting, SonarCloud quality gates and SSH-based production deployment.
- Deployed **nine mini-games** as independent static NGINX bundles to decouple game releases from the core platform.

Full-Stack Developer Intern — Food4Future Technologies
React, Node.js, MongoDB, Docker, Odoo CRM *Jul 2025 – Aug 2025*

- Delivered an e-commerce platform (youareshot.com) with **English/Arabic RTL** support, TND currency, Docker deployment, **15+ GA4 events** and Odoo CRM integration.

Network Engineering Intern — Tunisie Telecom
Network infrastructure, equipment configuration, diagnostics *Summer 2024*

- Worked on infrastructure serving **50+ devices**; reported **30% faster incident resolution** and **36 hours/month** of recovered availability.

Selected Projects

AI Job Interview Simulator — SmartCareer AI / CV Studio ***(ESPRIT, personal module of a 4-part team project)***
Python, FastAPI, Angular 20, Ollama, Mistral-7B, FAISS, SQLite *2026 – 2027*

- Built a **local LLM interview simulator**: Mistral-7B served by Ollama, a three-stage prompt pipeline (questions, evaluation, STAR rewriting) and schema-constrained JSON output with a temperature-0.1 repair pass.
- Implemented a **RAG layer** (72-chunk knowledge base, all-MiniLM-L6-v2, FAISS) with sources cited in the UI, plus fail-soft degradation returning typed errors instead of 500s.
- Added **PII redaction** with an assertion guard and prompt-injection defence; secured FastAPI endpoints with JWT and GPU-aware concurrency limits; built the Angular UI with NDJSON streaming.
- Validated with **200 pytest tests and 12 Playwright E2E scenarios** (6 defects fixed); authored the **79-page** LaTeX technical chapter of the team report.

Freelancify — Microservices Freelancer Platform ***(ESPRIT, team of 6)***
Java 17, Spring Boot 3.2, Angular 17, Kubernetes, Keycloak, Jenkins, MySQL *Feb 2026 – Jun 2026*

- Owned the **Collaboration Service**: REST APIs and WebSocket/STOMP features for contract negotiation, Kanban task transitions, sprint management and milestone updates.
- Configured **Jenkins CI/CD**, Kubernetes, SonarQube quality gates, Flyway migrations, Spring Cloud Eureka and Keycloak JWT security with role-based Angular guards.

Learniverse — Cross-Platform E-Learning Platform ***(ESPRIT)***
Symfony, JavaFX, FlutterFlow *Feb 2025 – May 2025*

- Developed web, mobile and desktop applications with **2FA**, OAuth, session tracking, an administration panel and analytics.

Certifications

AWS Academy Cloud Foundations — *Amazon Web Services* *2026*
Hedera Certified Developer Associate (HCDA) — *Hedera* *2026*

Education

ESPRIT, Tunis *Jul 2023 – Aug 2026*
Engineering Degree in Software Architecture (SAE)
